Sr. Software Engineer

I'm an experienced Full Stack Developer and Tech Lead with a Computer Engineering degree and a proven track record of building high-quality websites and web applications. I'm also skilled in leading and mentoring teams to deliver excellent results and exceeding client expectations. Passionate about exploring new technologies and tools to improve development processes and outcomes.

WORK EXPERIENCE

Steadfast Collective • Southampton, United Kingdom • 08/2017 – Present

Technical Lead

- Lead and developed a complex Laravel application for virtual conferences that handles over 300,000 requests a day
- Developed a SPA with Laravel and Vue.js for a video consultation platform
- Lead and developed a React Native mobile app for a learning management system platform
- Optimized database performance in multiple applications by implementing indexes and query optimization
- Mentored developers and conducted code reviews, resulting in a reduction in code defects and an increase in code quality

PHP Developer

- Developed a cross-stitch designer and marketplace using Laravel and Vue.js
- Developed a variety of Laravel applications for several clients and internal projects

Chaptr • Southampton, UK • Full-time • 01/2014 – 08/2017
